

# BANK MANAGEMENT SYSTEM

## MARCUS BANK

DONE BY:

VANDANA PACHIPALA

# ACKNOWLEDGEMENT

This project has been brought to its successful conclusion only because of the continued support and guidance of some exceptional people and I would like to acknowledge and express my immense gratitude towards them in this section.

First, I would like to express my utmost gratitude towards God, without whose blessing and guidance the successful completion of this project would have been impossible to reach.

I would sincerely thank our school principal Mr. A.P. Sharma, senior vice principal Ms. Shirley Rappai and vice principals Mr. George Edison and Ms. Radhika Rele who have given me the opportunity to do this project which consequently helped me in doing a lot of research and to learn about many new things.

I am extremely thankful to my computer science teacher Mrs. Arshi Habiba for providing her support and guidance, which helped me in successfully completing this project.

I would also like to thank my parents and friends for their constant encouragement, support and guidance as well as the authors of the various articles that I referred to, which helped me a lot in finalizing the project.

# INTRODUCTION

A bank is a commercial or state institution that provides financial services, including issuing money, banknotes or debit cards, receiving deposits of money, lending money and processing transactions. A commercial bank is usually defined as an institution that provides selected banking services without meeting the legal definition of a bank. Banks have a long history and have influenced economy and politics for centuries. Banking services have expanded to include services directed at individuals and risks in these much smaller transactions are pooled.

In today's world, the way of functioning and managing the system has been totally changed. There is a sudden change in the structure, maintenance and modification, handling, leveling inside every system. Without managing system through computer applications and programming, the development of infrastructures are unfinished. There are many errors and drawbacks without use of computer programming and applications.

As we know that in today's challenging world, every system is developed and launched by the use of computer software and programming.

# OVERVIEW

The project that we have undertaken aims to develop a banking system that is clean, user – friendly and multi-functional. The project “Markus Bank 2.0” includes the following functionalities:

1. Transaction can be done with minimum user events.
2. All transactional details and accounts are stored in files on stable storage.
3. Customer can view their own account details and can use them as necessary.
4. All customers data are stored in files on a stable storage.
5. Accounts have to pass through a login system to enter their accounts.
6. This system possesses password protected administrative access; thus, preventing the whole management system from unauthorized access.

## HEADER FILES

1. # include <iostream>
2. # include <fstream>
3. # include <conio.h>
4. # include <string.h>
5. # include <cstdlib>

## FUNCTIONS INCLUDED

1. Void write\_account()
2. Void modify\_account()
3. Void deposit\_withdrawal()
4. Void delete\_account()
5. Void display\_all()
6. Void searchacc()
7. Void searchname()
8. Void searchbal()

## SOURCE CODE

```

## 1. NEW ACCOUNT

```
E:\marcus.exe

Account Number :67
Enter The Name of The account Holder : SAM
Enter Password : efg456
Enter Phone Number : 77554698
Enter The Initial amount(>=500) : 7000

Account Added.
Do You Want To Add Another Account(y/n):y
```

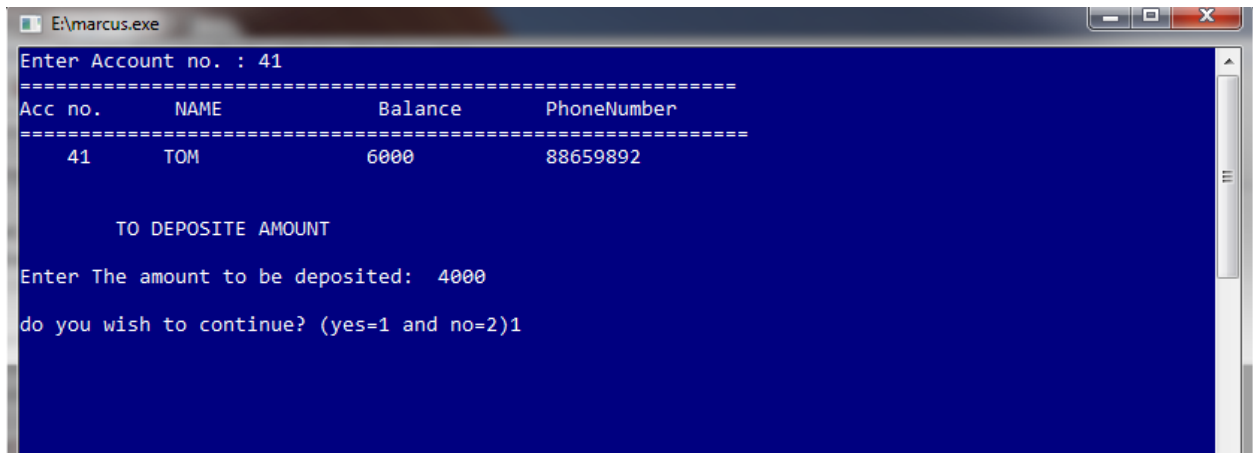

```
E:\marcus.exe

Account Number :41
Enter The Name of The account Holder : TOM
Enter Password : abc123
Enter Phone Number : 88659892
Enter The Initial amount(>=500) : 400

You need to deposit more money.
Enter Balance : 6000

Account Added.
Do You Want To Add Another Account(y/n):n
do you wish to continue? (yes=1 and no=2)1
```

## 2. DEPOSIT AMOUNT

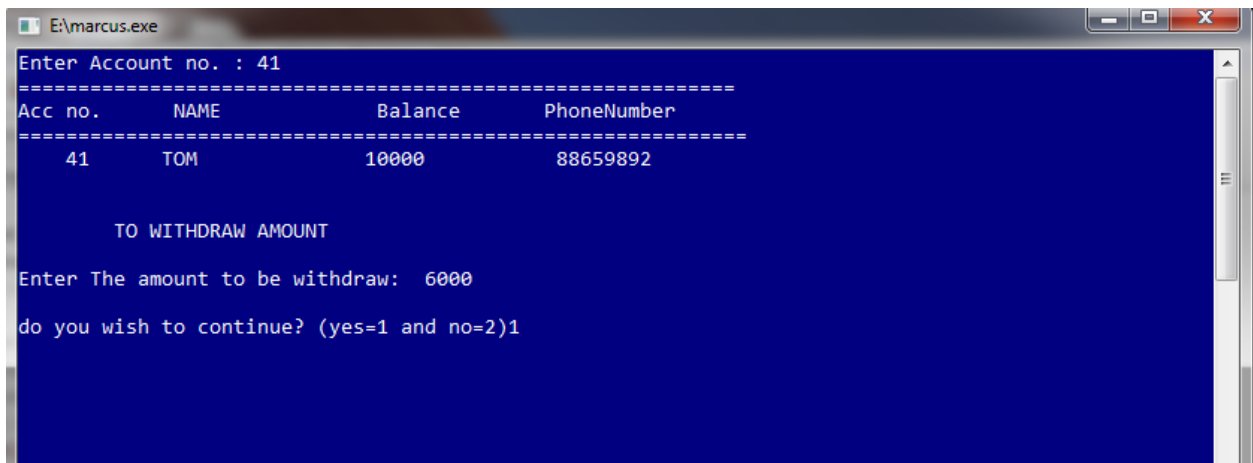

```
E:\marcus.exe
Enter Account no. : 41
=====
Acc no.      NAME      Balance      PhoneNumber
=====
    41      TOM        6000        88659892
=====

      TO DEPOSITE AMOUNT

Enter The amount to be deposited: 4000

do you wish to continue? (yes=1 and no=2)1
```

## 3. WITHDRAW AMOUNT

```
E:\marcus.exe
Enter Account no. : 41
=====
Acc no.      NAME      Balance      PhoneNumber
=====
    41      TOM       10000        88659892
=====

      TO WITHDRAW AMOUNT

Enter The amount to be withdraw: 6000

do you wish to continue? (yes=1 and no=2)1
```

#### 4. BALANCE ENQUIRY

```
E:\marcus.exe
Choose what to search by:
1. ID no.
2. Name
3. Balance
```

```
E:\marcus.exe
BALANCE DETAILS
Enter Account no. :41
=====
Acc no.      NAME      Balance      PhoneNumber
=====
    41      TOM      4000      88659892

Do You Want To Search Another Enquiry(y/n):
```

```
E:\marcus.exe
